WORK EXPERIENCE

Sentry Insurance

April 2024 - Present

Software Developer

- Developed and maintained a gateway data hub using .NET 8, Entity Framework, and SQL Server, integrating data across 20+ enterprise systems for migration from a legacy platform to a vendor solution.
- Reduced data synchronization time by ~80% through query optimization and architectural refactoring of the gateway hub's processing pipeline, improving throughput across 20+ integrated enterprise systems.
- Designed event-driven processing, data auditing workflows, and internal/vendor API and FTP integrations supporting both real-time and deferred data updates.
- Owned production support across 15 interconnected systems, serving as the primary point of contact for defect triage, root cause analysis, and cross-team resolution with business users, and product stakeholders.
- Held a dual role as Scrum Master and contributing developer, facilitating sprint ceremonies and team coordination contributing to reducing our concurrent defect backlog items from 45 to 3.

United Parcel Service

September 2023 - April 2024

IT Technician

- Provided internal technical support to 6 buildings, along with external support for customers utilizing UPS Software.
- Supported network infrastructure, and systems, as well as external customer databases and applications.
- Installed, configured, and supported hardware and software systems in fast-paced operational environments.

PROJECTS

Fitness Tracker

Go, React, Postgres, Docker, Clerk, Stripe, GCP

- Architected a fitness application with Go/Gin backend, React/Typescript frontend, and PostgreSQL database, following a clean architecture with handler/service separation and DI container pattern.
- Implemented authentication via Clerk with JWT middleware and Svix-verified webhooks for user provisioning; integrated Stripe for subscription billing and payment management.
- Containerized with Docker and deployed to Google Cloud Run via GitHub Actions CI/CD, using Google Artifact Registry for image management and Cloud SQL for the managed database layer.

Photo Share App (In Progress)

Rust, React, SQLite, Docker, Stripe, GCP, GCS

- Developing a photo share platform with Rust backend and React frontend focused on user experience, performance, and lightweight architecture.
- Designing RESTful APIs, image upload workflows, and client-side gallery using SQLite for local data persistence.

Liardle

Go, React, DigitalOcean

- Developed and deployed a browser-based Wordle-style game using Go server and React client.
- Hosted the application on DigitalOcean Droplet with custom deployment and server configuration.

EDUCATION

Northern Michigan University

Graduated, December 2023

Bachelor of Science in Computer Science

TECHNICAL SKILLS

- **Languages:** C#, Go, TypeScript, JavaScript, Rust, Python, SQL, HTML/CSS
- **Frameworks & Technologies:** .NET 8, ASP.NET Core, React, Vue, Gin, Flask, Entity Framework, Linux, REST APIs
- **Cloud & Tools:** AWS (EC2, S3), Google Cloud Platform (App Platform, GCS, Cloud SQL), Digital Ocean, Git, Docker
- **Databases:** SQL Server, PostgreSQL, MongoDB, SQLite
